

**We architect the
solution.**

**We bring your teams
on board.**

Digital transformation from strategy to results —
with a clear plan and teams that truly embrace
the change.

STRATEGY . TRANSFORMATION . RESULTS

DIGITAL ARCHITECTURE & EXECUTION — WE STAY UNTIL RESULTS ARE DELIVERED

We design the architecture. We deliver the results.

Your business model is solid. Growth doesn't forgive disorder. That's where we step in.

Growth creates chaos. Chaos slows growth. StemJee helps organizations optimize their operations, align their teams and adapt their infrastructure to their real strategy — measurable results at every stage. No generic model. No shelf-bound deliverable.

FOUR WAYS TO WORK TOGETHER

Digital Optimization Plan

Understand before you invest.

We map your operational reality *visually* for fast, shared understanding — **what works, what's holding you back, what's costing you without you knowing.** Result: a clear action plan, not a shelf-bound PowerPoint.

- ✓ 90-day action plan — quick, visible wins from day one
- ✓ 12–36 month strategic vision — sequenced around your real resources
- ✓ Growth levers identified — the ones you can't see from the inside

FLAGSHIP SERVICE

Document Management

End the chaos. Bring in clarity.

On average, your employees spend 40 minutes a day searching for the right file — not counting duplicates and conflicting versions. We structure Microsoft 365 / SharePoint so **information is found in seconds.**

- ✓ Cross-team collaboration without silos — everyone works for the same organization
- ✓ Each employee sees only what they need to see — security and legal compliance built in
- ✓ Clean, lasting structure your IT team can manage without us

Large Project Support

On your side — not the vendor's.

A role often overlooked, yet decisive. We act as your experienced project manager, entirely on your side. We know the technology — but **it's your business strategy we defend.** We bridge **business language** and **technology language** — the source of most costly misunderstandings.

- ✓ Your experienced PM facing vendors — you're never alone at the table
- ✓ Integrated strategy ↔ technology translation — less friction, more results
- ✓ Multiplied success odds — a smooth transition doesn't happen by chance

Implementation

From the "napkin sketch" to launch — end to end.

You have a vision — or just a rough idea. We take your intention and turn it into operational reality: architecture, integration, configuration and launch. **From your first idea to go-live,** with you at every step. Whether it's our architectures or yours — we implement. That's the full loop.

- ✓ From initial sketch to full deployment — we close the gap without compromise
- ✓ Structured autonomy transfer — zero dependency created on StemJee
- ✓ Support during stabilization — we stay until it's truly running

DOES THIS SOUND FAMILIAR?

You're managing emergencies, not an organization

Every day looks like the last. Your team gives everything — but you're fixing more than you're building. Growth waits while operations consume everything.

REACTIVE

Your tools are all there — they just don't talk to each other

You're paying for solutions that coexist without connecting. Your teams re-enter the same data by hand. The intelligence sleeping in your systems escapes you completely.

FRAGMENTED

Your vision is clear — the infrastructure isn't keeping up

You know exactly where you want to go. But every growth project reveals a new crack. You're rebuilding instead of scaling — and it's costly.

ÉCO™ · FREE · NO COMMITMENT

Where does your organization really stand digitally?

Before committing resources to a transformation, you need to see reality clearly. The ÉCO™ pre-assessment reveals in 5 minutes the gap between your vision and your operational reality — with a personalized report generated instantly. A real strategic conversation, not a sales pitch.

✓ Free & confidential

✓ 5 minutes · 10 questions

✓ Instant report

✓ No commitment

WE'VE SIMPLIFIED THIS.

1

ÉCO™ Pre-Assessment

10 questions about your vision, your tools and your current state. Personalized profile report — free, instant.

2

Exploratory Call

30 minutes to dig into your priority challenges. No pitch — a real strategic conversation.

3

Complete Diagnostic

Mapping of your operational reality: tools, teams, processes. Prioritized action plan as output.

4

Guided Execution

Implementation, change management, training. We stay until your teams have mastered their system.

WHAT WE DELIVER CONCRETELY

Strategic Alignment Sprint

Clarify intention before investing.

We align your leadership around a shared direction, identify high-impact priorities and define what needs to change — and in what order. Break out of reactive mode and regain structured vision.

Ecosystem Diagram

Visualize the target architecture.

We map your information flows, tools and processes to reveal grey zones, duplicates and critical dependencies. A clear picture of your current system and its trajectory.

Rigorous Tool Selection

Decide with solid criteria, not gut feelings.

We evaluate technology solutions against precise strategic criteria: compatibility, adoption, scalability and alignment with your vision. Every decision is justified and structured.

Implementation Roadmap

Plan before you execute.

We build a realistic 12–36 month roadmap, prioritized and sequenced. You know what to do, in what order, with which team — and what impact to expect at each stage.

Architecture before tools

We don't sell software. We never recommend a tool without first designing the structure that justifies it. Technology comes last — always.

Your autonomy, our real success

We build to no longer be needed. When your teams master their system and work without us, our mission is accomplished.

Quick wins, not just a vision

We start with what unlocks the most value quickly. Each step delivers a concrete result before moving to the next.

Ready to see where you really stand?

Start with the ÉCO™ pre-assessment — 5 minutes for an honest picture of your digital maturity. Or schedule an exploratory 30-minute call directly. No pitch.
